

Using the resource

*I use these pictures to help teach the causes of the Great Fire of London. I have the children draw lines down the middle of their books and label one side 'causes' and the other 'other factors'. They then cut and stick the pictures into each side depending on what they think. If you are unable to print these (or you don't want to) they can also be shown on IWB and children can copy down the causes into the correct side.*

*Thanks for downloading, please leave me a review 😊*

*The Ginger Teacher*

Strong wind

Churches were made from stone and brick

Lots of boats were used

No running water

No fire brigade

Houses made from wood and straw

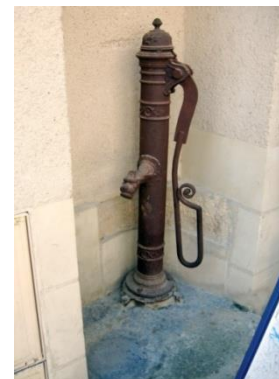

Close houses and small streets

Oil was used in lamps

The buckets leaked and didn't hold much water

Broken water pump near the bakery

Beds and furniture was made from straw and wood

Rubbish in the streets

Lots of warehouses stored oil, candles and coal

Houses close to the river

Metal (lead) was used in the buildings

It was September

Hot summer and dry houses

People jumped on rooftops to escape
