

# The Ultimate Jungle Survival Guide

- 11 To survive in the jungle, one of the world's harshest and  
19 most inhospitable places, your two priorities are clear:  
29 water and shelter. Without these, you won't make it a  
31 single night.
- 41 Deep within the jungle, sources of fresh water are hard  
53 to come by. Keep an eye out for any fallen leaves which  
62 have caught pools of rainwater and drink them straight  
74 away. You need to drink around 10 litres of water a day  
81 to stay alive in this raging heat.
- 91 Before darkness falls, build a shelter high up off the  
99 ground to avoid tigers and other predators overnight.
- 108 Banana leaves make an excellent shelter from the rain  
116 and vines will hold together your hammock whilst  
118 you sleep.
